

# Anti-Corruption and Integrity: A Global Perspective

Regional workshop: Harnessing the Power of Data to  
Promote the Anti-Corruption and Development Nexus

26-28 May 2025

Amman, Hashemite Kingdom of Jordan

Presentation by Anga R Timilsina (Ph.D.)  
UNDP Global Anti-Corruption Advisor

## Outline:

- 1. Where is the global integrity & anti-corruption movement at this moment? What is working and what is not working?**

---
- 2. What is UNDP's approach? What are UNDP's priorities?**

---
- 3. A few key take aways**

---

**1. Let us begin with this key question: Are we winning or losing the battle against corruption?**

# Are we winning or losing a battle against corruption?

- Depends on who you ask (Academia vs. practitioners); and which aspects of anti-corruption we examine
- Depends on how you define and measure success.
- In econometrics, usually the null hypothesis is a statement of 'no effect' or 'no difference'
- The issue of evaluating the success of AC is similar to evaluating the overall development effectiveness (e.g., the graduation of LDCs)
- We don't have enough data and evidence to know what is working and what is not working.

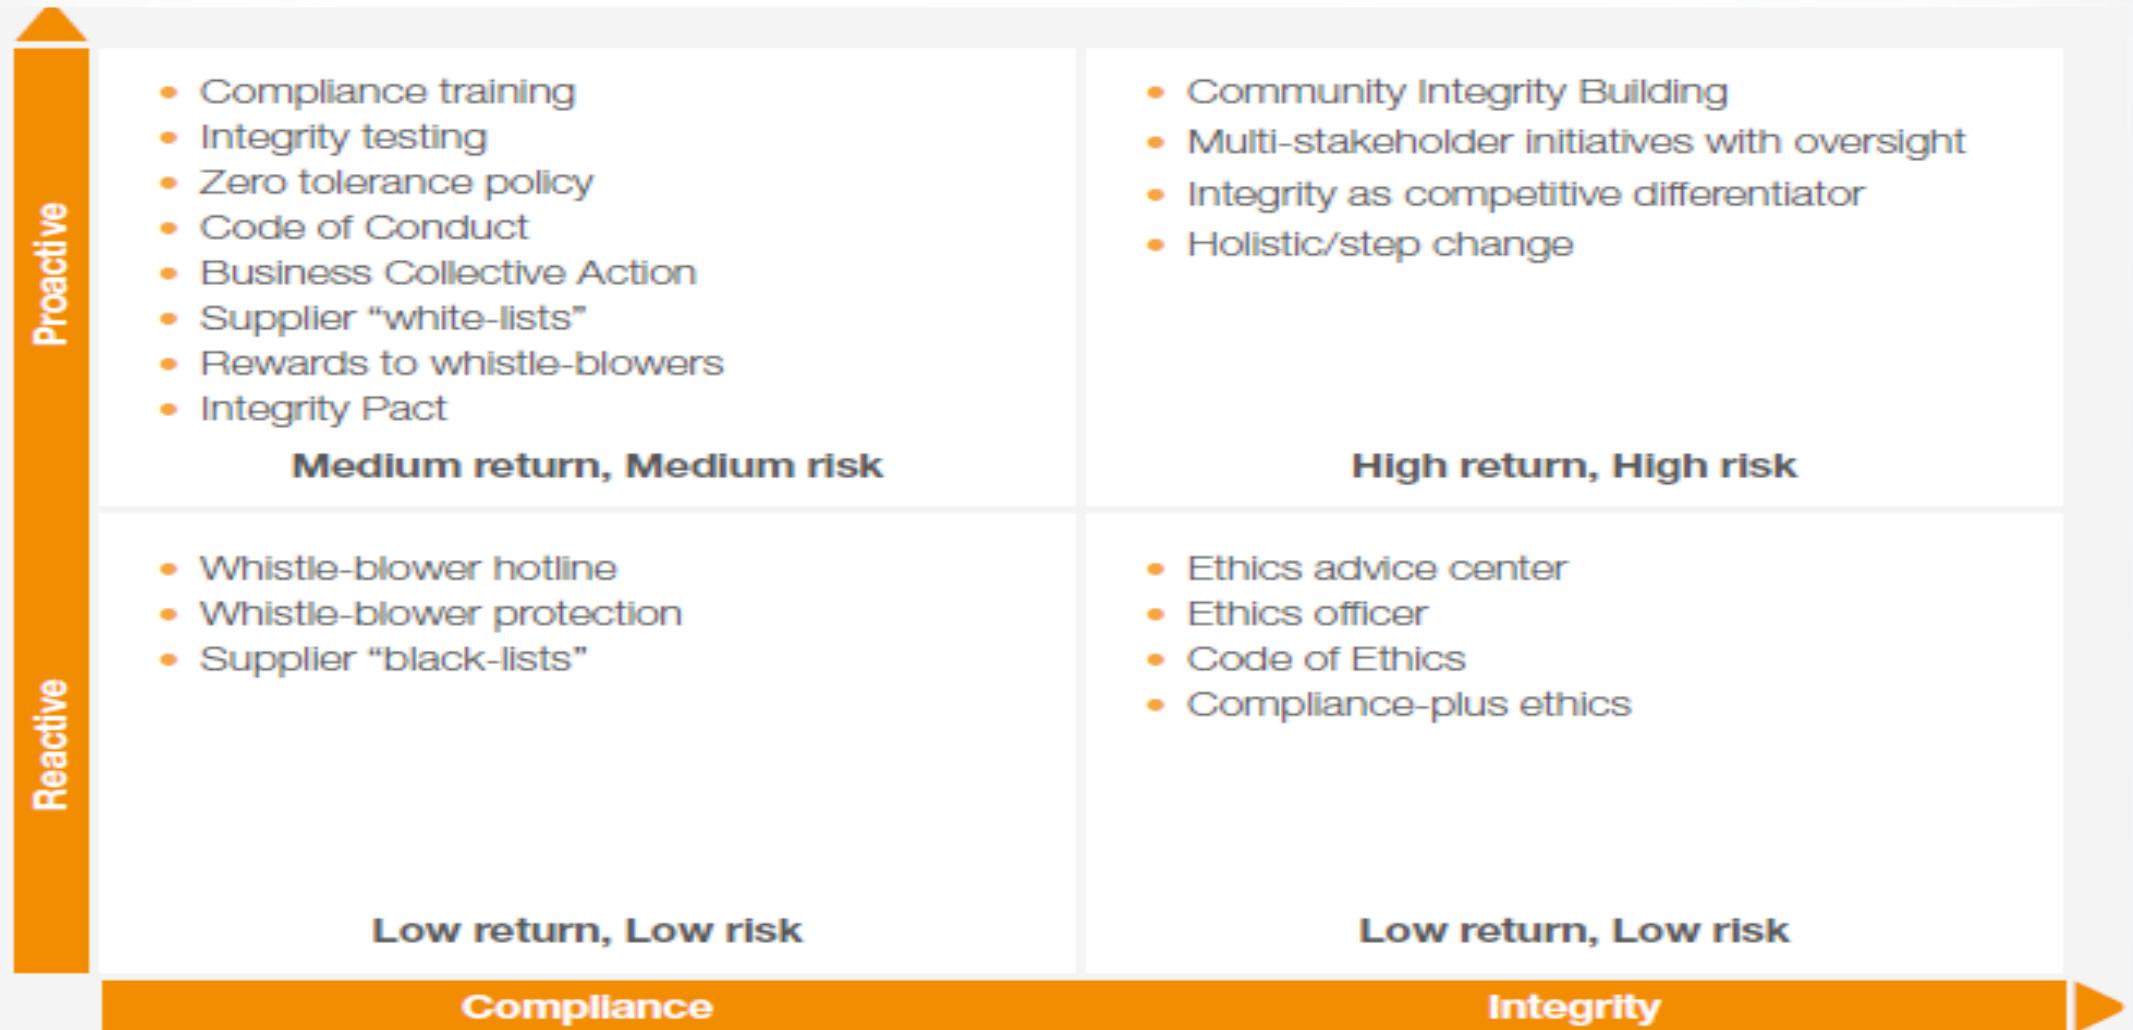

The evidence on the effectiveness of the four selected direct anti-corruption interventions is mostly weak.

et al, 2012,  
U4 Issue paper

# Reactive compliance & reactive integrity versus proactive compliance & proactive integrity building

Source: Joy Saunders, 2014

# Is corruption going up — or are we just more aware of it?

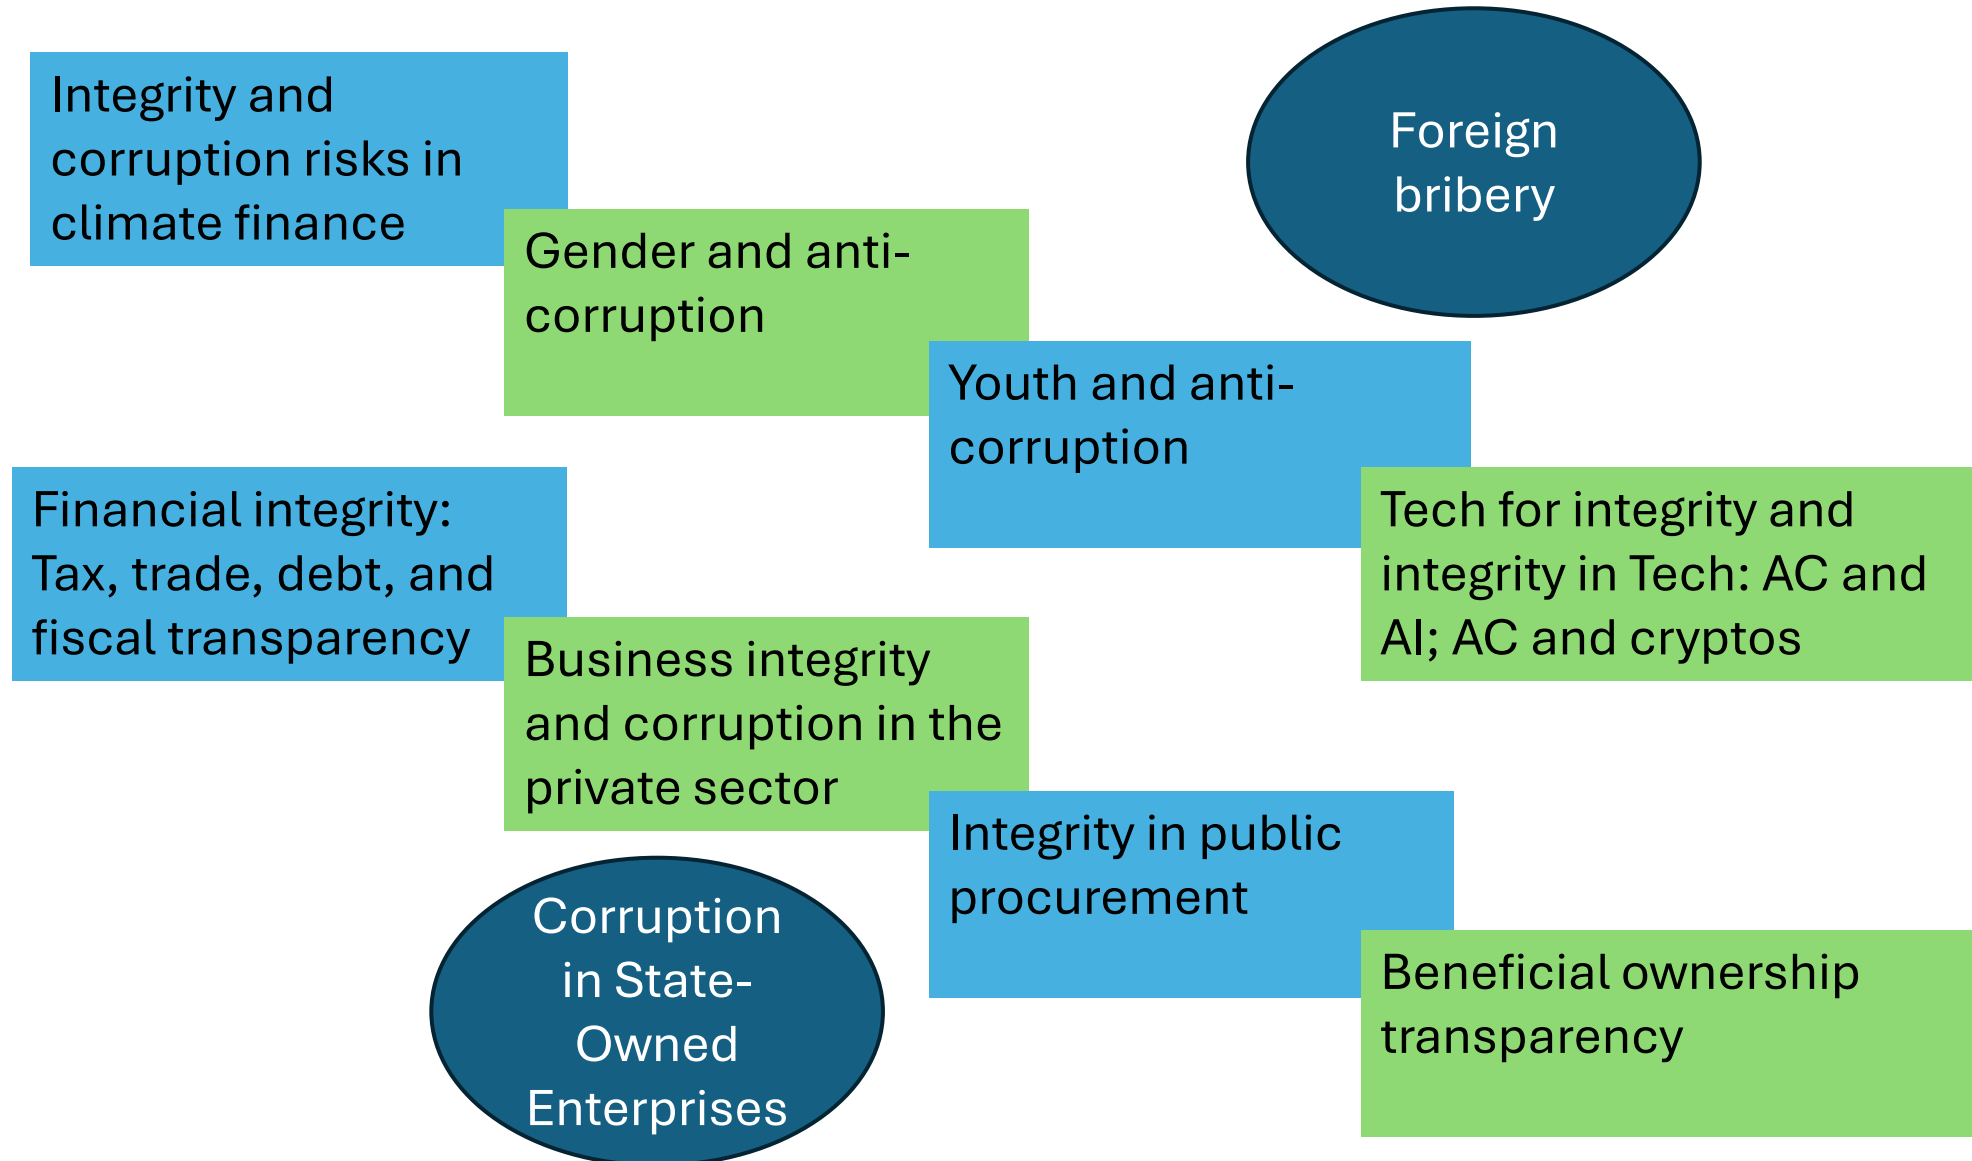

Manifestations and the level of sophistication of corruption has changed, but....

**Advocacy, media freedom, and digital transparency have grown**, making it easier to report, expose, and discuss corruption.

**Perception of increased corruption can be driven by increased reporting and awareness**, not necessarily by a real rise in incidence.

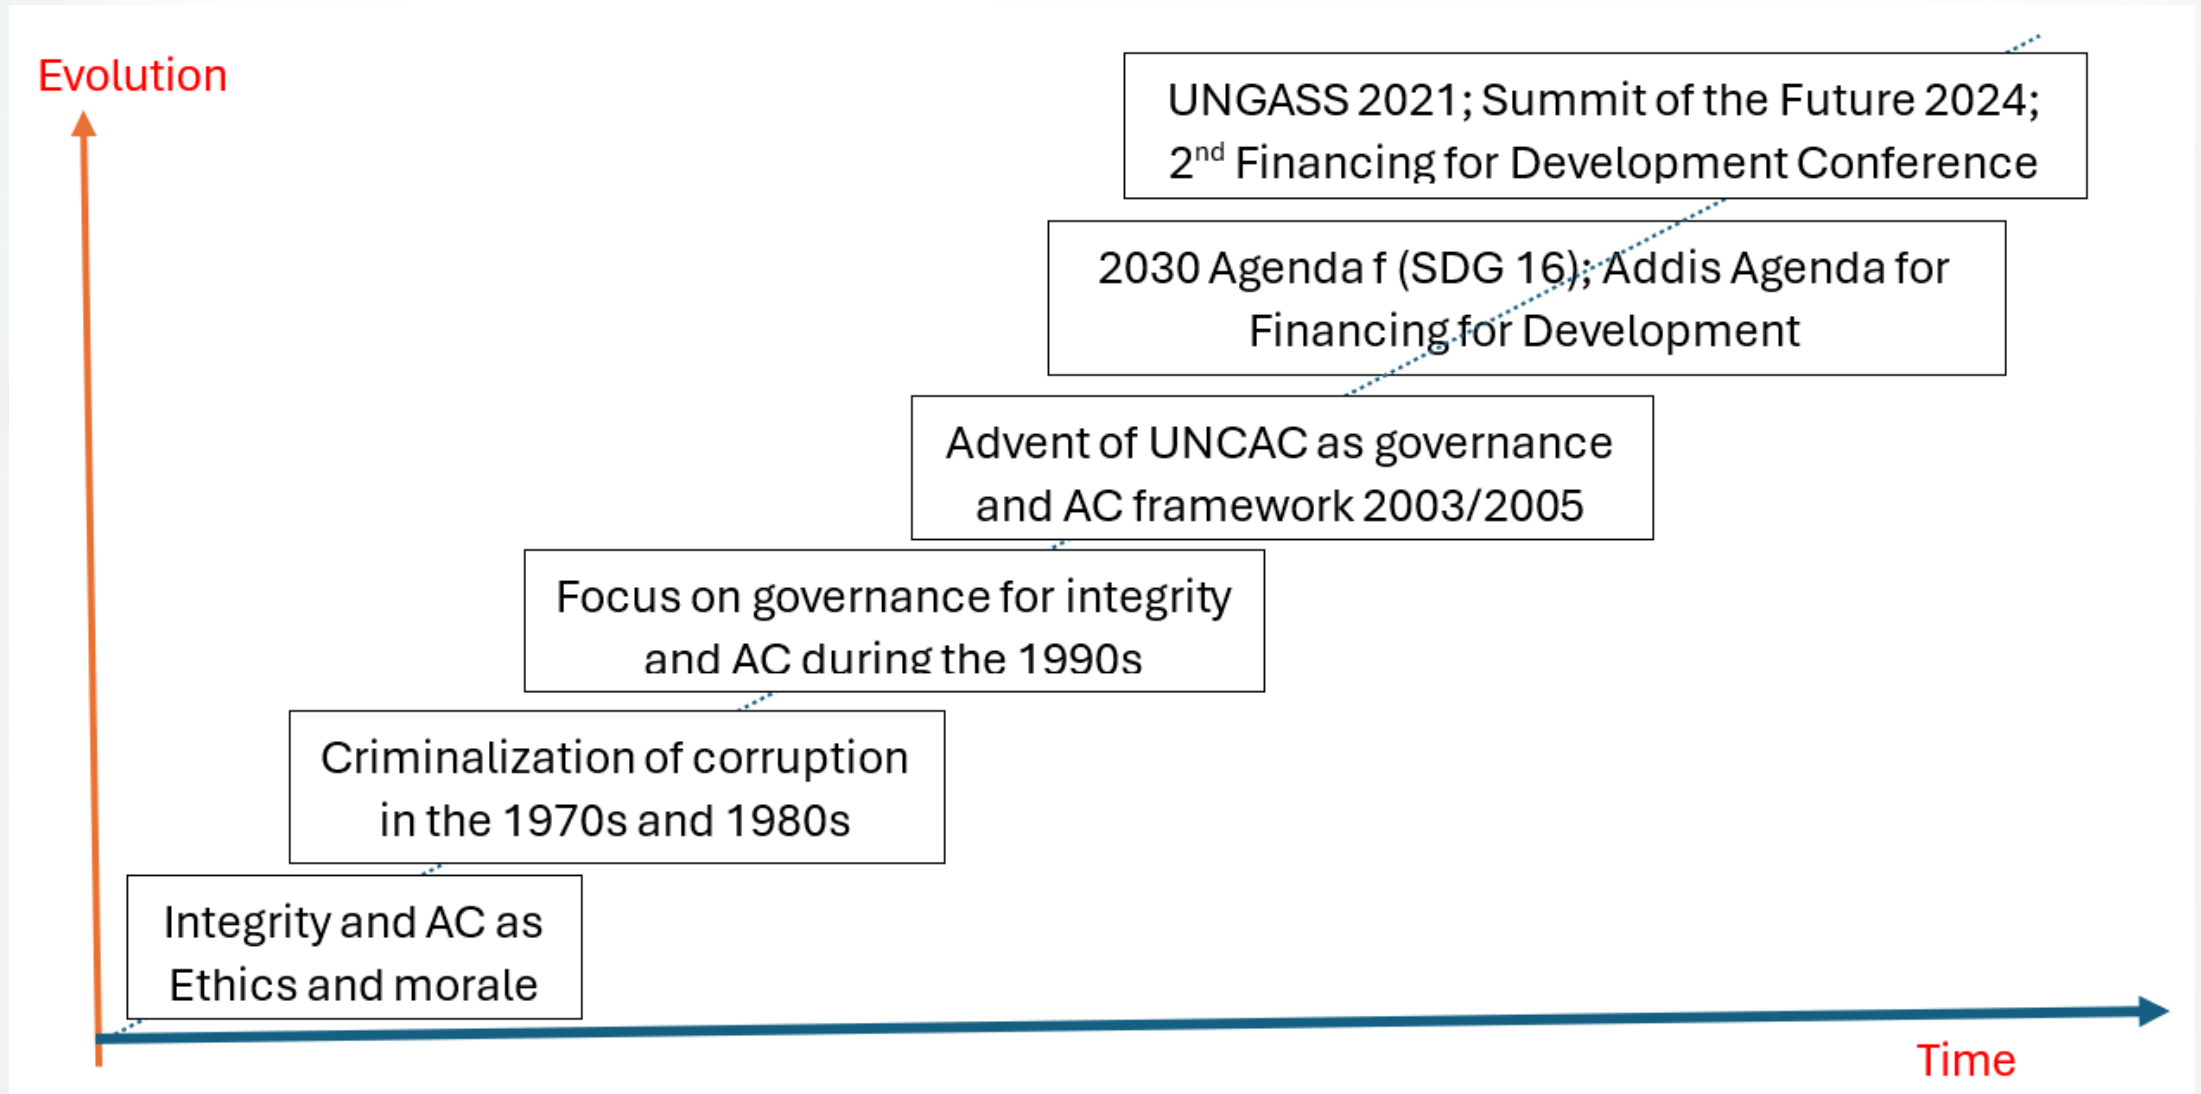

A spike in corruption discussion might mean anti-corruption, oversight institutions, journalists, and civil society are getting better at anti-corruption.

# Emerging integrity and anti-corruption issues:

## Historical evolution: Integrity and anti-corruption

# Progress on integrity and anti-corruption

1. Recognition of critical role of governance and anti-corruption in enhancing sustainable development and development financing.
2. UNCAC and other international norms and standards have been instrumental for the review of institutional setup and arrangements.
3. More laws, institutions, policies and mechanisms to promote integrity and combat corruption.
4. More knowledge, networks, connectivity, and lesson learned; increased global advocacy
5. AC movement benefited from various transparency movements, (OGP, OCP, EITI, open budget, open contracting, open procurement, open data, tax/revenue transparency)

# Challenges and lessons learned: Integrity & Anti-corruption

1. **Bridging the enforcement gap:** Huge gap between laws, policies, institutions and their effectiveness; moving from compliance to effectiveness; weak capacity of ACAs to build integrity
2. **Catching up with emerging issues:** BOT, business integrity, foreign bribery, political finance gender/youth, integrity and corruption issues related to new technologies (e.g., cryptos), financial integrity (tax, debt, expenditure, trade, procurement transparency), etc.
3. **Integration is easier said than done** (needs deliberate efforts to integrate AC in various levels – national/local, and sectors)
4. **Engaging on bigger and sustained impact** – from producing knowledge to actually applying it, from project to programming/portfolio approach, and from pilots to system approach/long-term capacity development,.
5. **Tapping into innovation and technology** (but also being mindful of digital divide, concerns about privacy, human rights, trust, ethics)
6. **Measuring corruption and anti-corruption:** Not enough data.

## **2. What is UNDP approach? What are UNDP's priorities?**

---

# UNDP's Work on Integrity & Anti-Corruption:

An integral part of our governance work since 1999 when UNDP published its first corporate policy paper, 'Fighting Corruption to Improve Governance'.

## Mainstreaming Anti-Corruption in Development

ANTI-CORRUPTION PRACTICE NOTE

December 2008

## CONTENTS

#### ABBREVIATIONS AND ACRONYM

## EXECUTIVE SUMMARY

## 1. INTRODUCTION

## 2. UNDP'S NATURE AND PURPOSE

- 2.1 BUILDING UPON EXISTING EXPERTISE
  - 2.2 UNIP AND INTERNATIONAL LAW
    - 2.2.1 OMCAC as a framework for UNIP
    - 2.2.2 UNIP's comparative advantage
    - 2.2.3 Other international legal systems
- ### A. OPERATIONAL IMPLICATIONS

### 3. OPERATIONAL IMPLICATIONS

- 3.1 DEMANDING EFFECTIVE STRATEGIES
  - 3.1.1 Approaches and techniques
  - 3.1.2 Global, regional and country
  - 3.1.3 Monitoring and coverage
  - 3.1.4 Supporting and completion
  - 3.1.5 Research and planning
  - 3.1.6 Identifying and coverage
  - 3.1.7 Building partnerships
- 3.2 UNDP STRATEGIC AREA OF WORK
  - 3.2.1 The training sub-strategies
  - 3.2.2 Linking governments and civil society
  - 3.2.3 Strengthening media and civil society
  - 3.2.4 Improving documentation
  - 3.2.5 Improving awareness and skills
- 3.3 LEADING BY EXAMPLE: STRONG

## ANNEXES: (POLICES, PRINCIPES)

## ANTI-CORRUPTION STRATEGIES: UNDERSTANDING WHAT WORKS, WHAT DOESN'T AND WHY?

Empowered Over  
Disempowered

## STAYING ON TRACK: TACKLING CORRUPTION RISKS IN CLIMATE CHANGE

# Capacity Assessment of Anti-Corruption Agencies

BUSINESS INTEGRITY TOOLKIT  
FOR YOUNG ENTREPRENEURS

SEEING BEYOND THE STATE:  
GRASSROOTS WOMEN'S PERSPECTIVES  
ON CORRUPTION AND ANTI-CORRUPTION

## New Technologies for Sustainable Development:

PERSPECTIVES ON INTEGRITY,  
TRUST AND ANTI-CORRUPTION

GLOBAL INTEGRITY

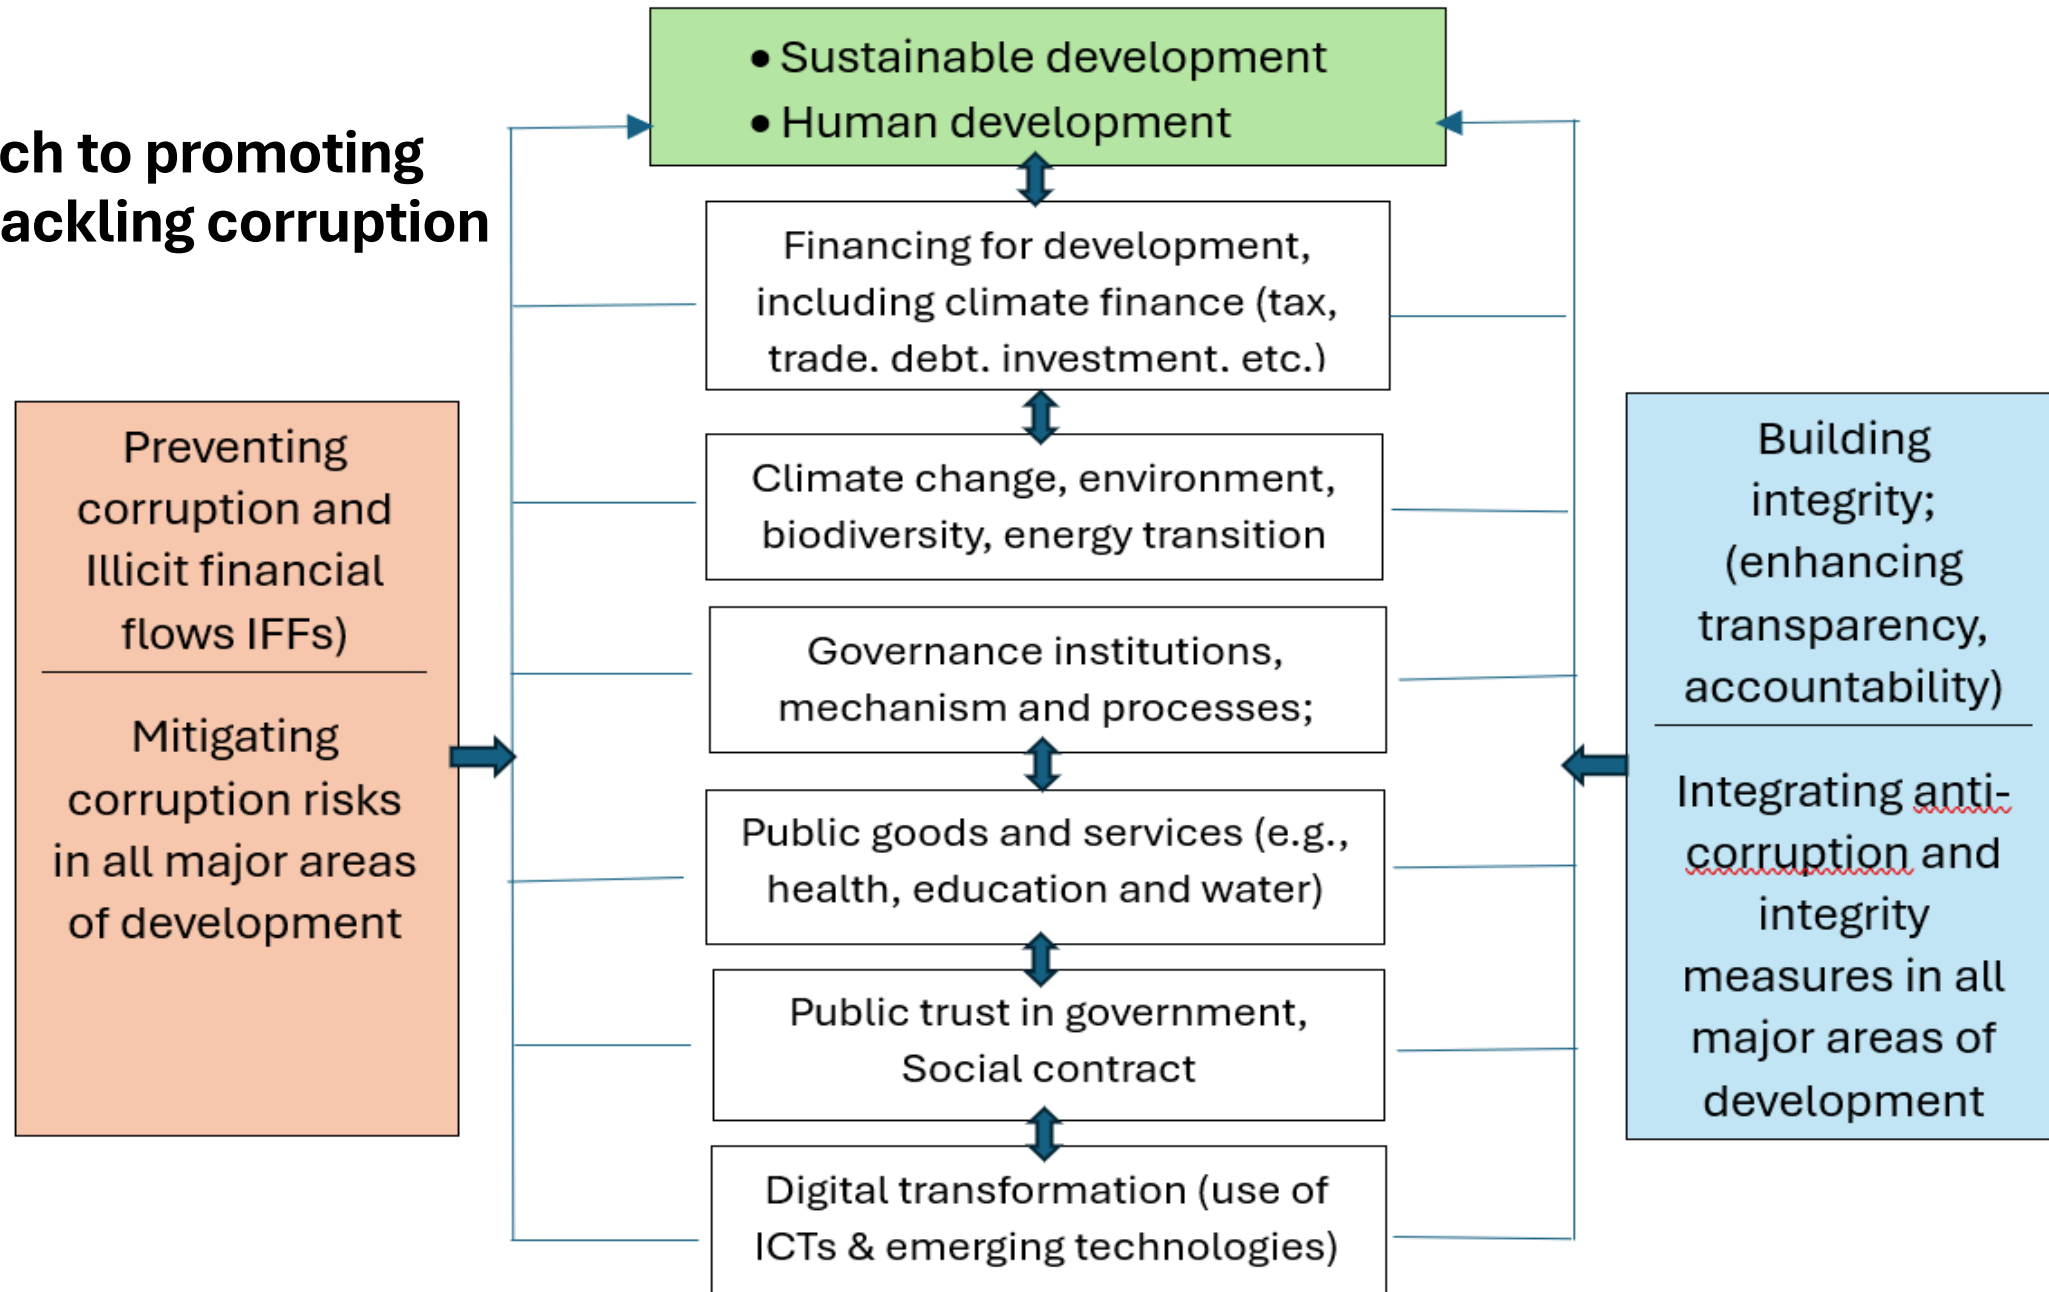

Engineering & Technology

## User's Guide to MEASURING CORRUPTION AND ANTI-CORRUPTION

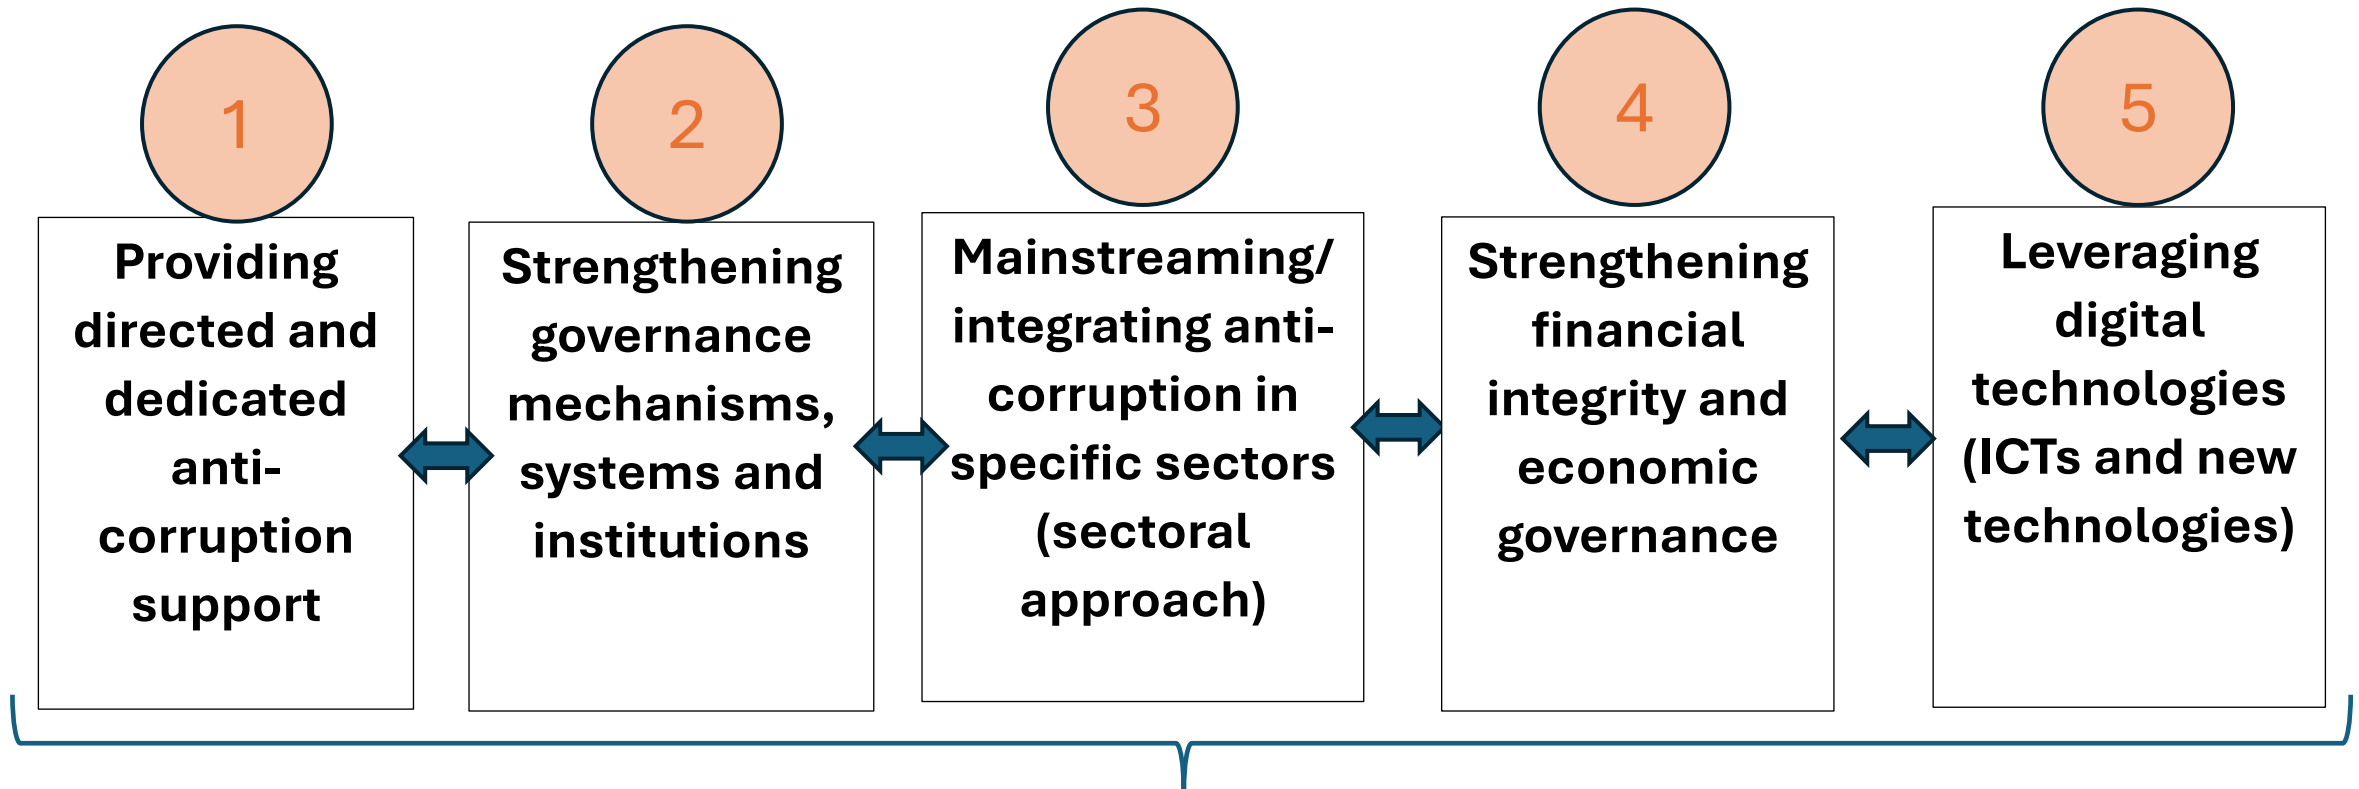

## UNDP approach to promoting Integrity and tackling corruption

Source: Author

# Integrity and anti-corruption – UNDP priorities/programming entry points:

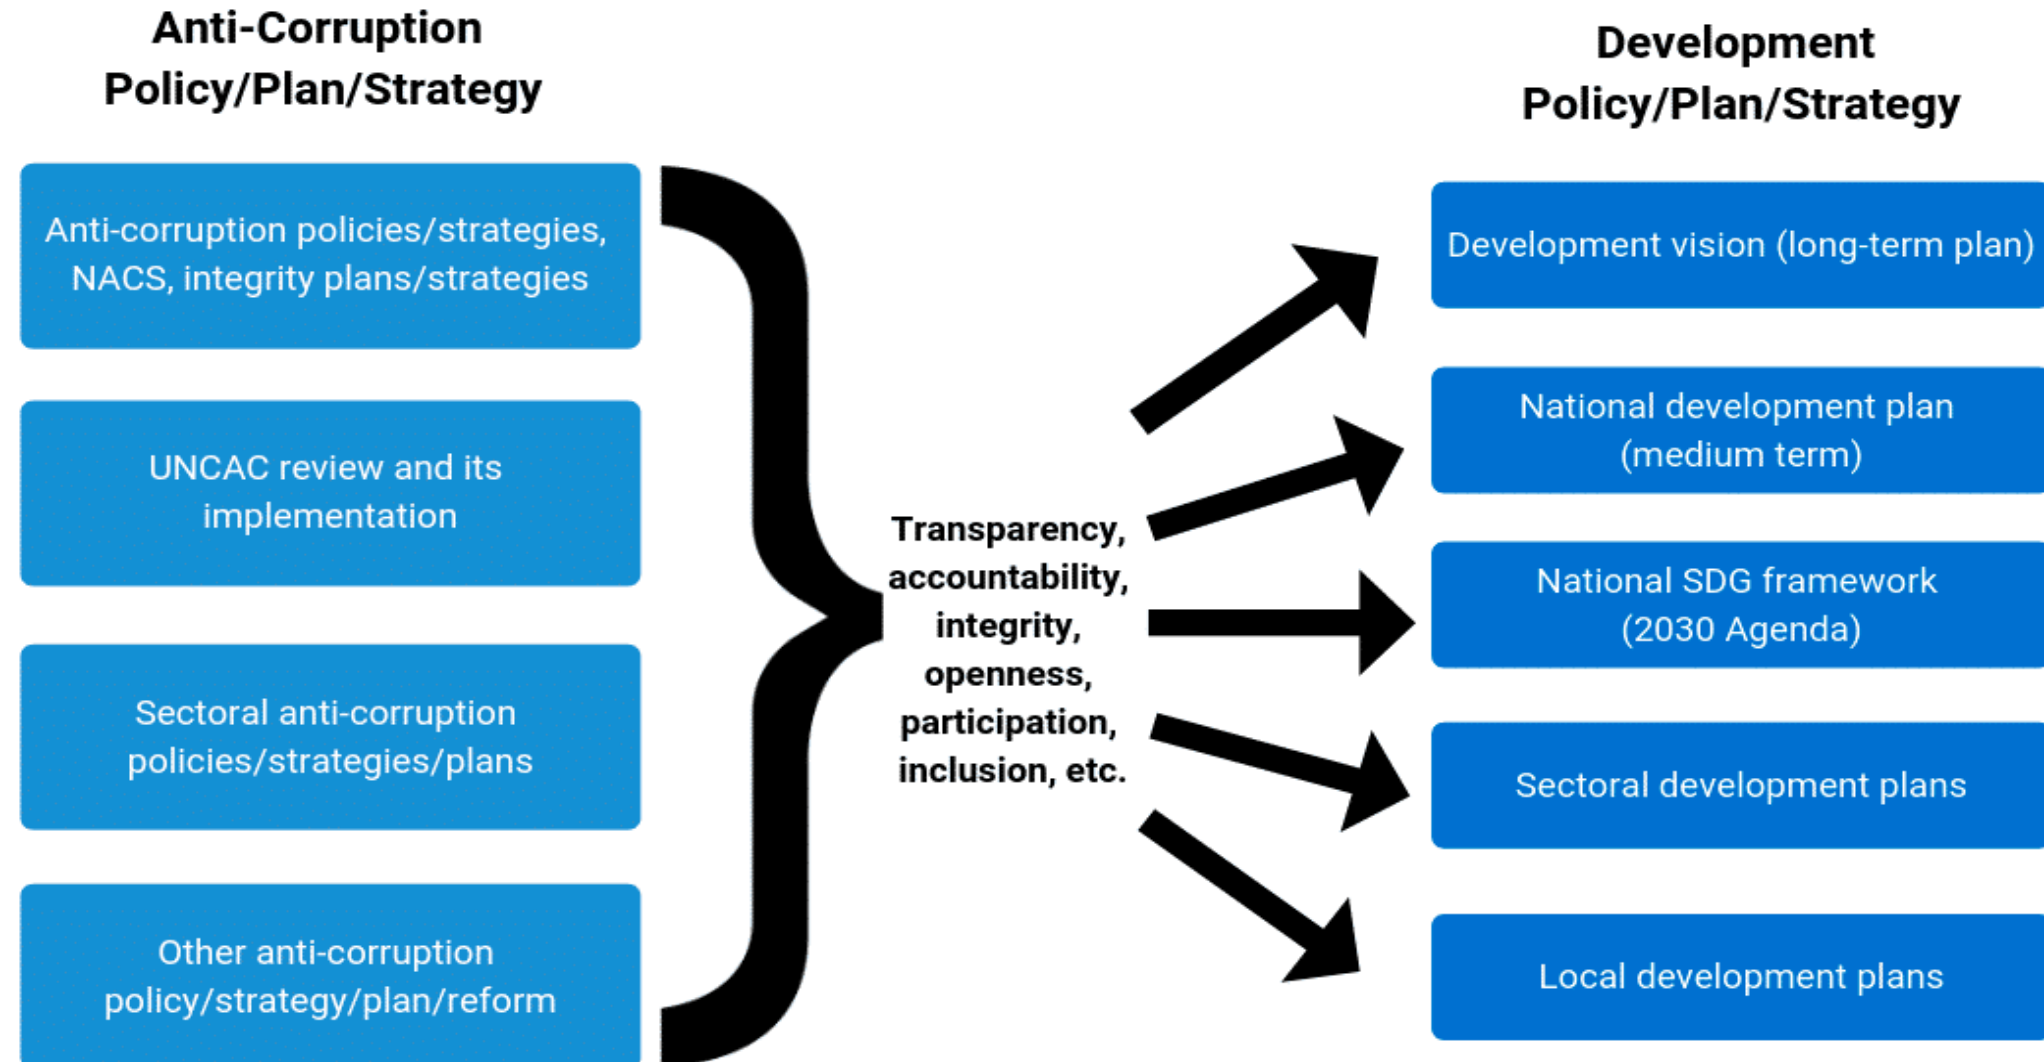

**Data, statistics, measurement, monitoring, evaluation**

# Key take aways:

1. Developing a common language for mainstreaming/integrating anti-corruption (e.g., risk management, integrity-building, oversights, audits, transparency)
2. Getting out of the 'corruption trap' experienced by vast majority of middle-income countries
3. Focusing on strengthening entire ethics and integrity infrastructure; balancing the role of ACAs in terms of their mandates
4. Tapping into a vast potential of new technologies (e.g., AI)
5. Producing objective and actionable data on corruption and anti-corruption measurement

# What does it mean to integrate anti-corruption in development?

**In practice, integrating anti-corruption still has a missing middle-problem:**

- **Anti-corruption strategies not effectively targeting the sectoral integrity-building (or mitigating corruption risks in specific sectors)**
- **Sectoral plans/initiatives not adequately integrating anti-corruption measures**

## **Integrity and anti-corruption**

**Various areas of development (service delivery, climate change, peace-building, etc.)**

## Corruption and human development: Explaining the corruption trap?

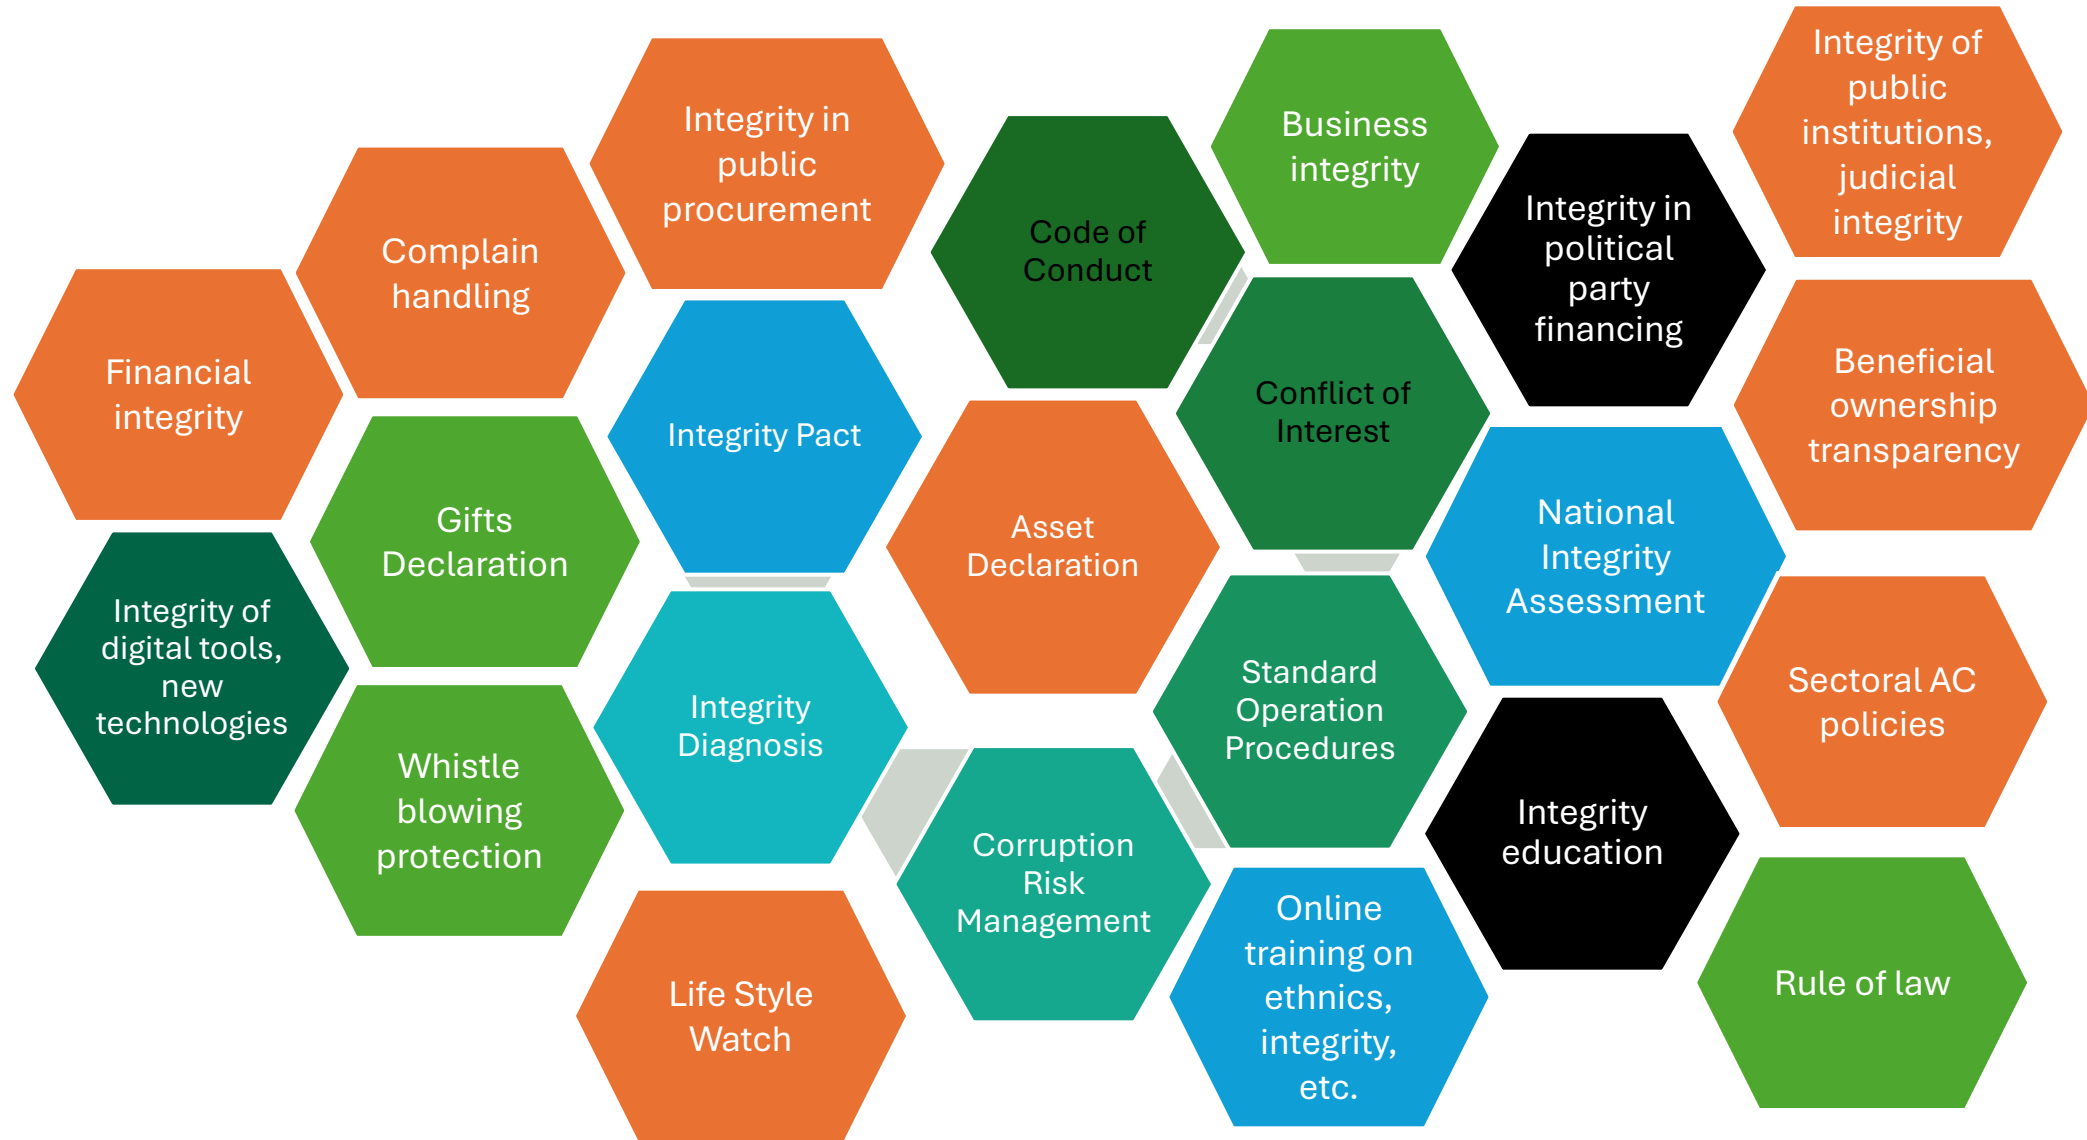

Sources: Transparency International; UN Human Development Report

# Explaining the middle-income corruption trap

# Anti-corruption is about strengthening the entire **‘ethics and integrity infrastructure’**.

The future has many names:  
For the weak it is unattainable,  
For the fearful it is unknown,  
For the bold it is opportunity.

--Victor Hugo
